

Christopher (Chris) Deir, Manager, Nuclear Business Development at Babcock & Wilcox Canada Ltd. (B&W Canada) is leading initiatives to develop the B&W mPower™ reactor business for the Canadian market. Chris leads multi-disciplined teams to develop partnerships, strategic alliances, and licensing agreements for this emerging market in Canada.

Chris has worked extensively in the Canadian nuclear industry for over 15 years, starting with the design of new systems for both CANDU 6 and ACR at AECL Chalk River and Sheridan Park, which led to successive roles of increasing responsibility in the engineering at the OPG Pickering A Units 1 & 4 Restart projects and the Bruce A Units 1 & 2 Restart project. Most recently Chris worked with Hitachi Canada Ltd., responsible for all business development activities for Hitachi within the CANDU field. Chris is a professional engineer, licensed in the province of Ontario and holds a Masters degree in Chemical Engineering and Applied Chemistry, and a Bachelor of Engineering (Nuclear and Thermal Power), both from the University of Toronto.
