

ROLPHTON  
NUCLEAR TRAINING CENTRE

COURSE PI 24

This course was originally developed for  
the use of Ontario Hydro employees.  
Reproduced on the CANTEACH web  
site with permission

FOR ONTARIO HYDRO USE ONLY

NUCLEAR TRAINING COURSE

COURSE PI 24

CHEMISTRY

INDEX

PI 24.00-0	Introduction
PI 24.11-1	Isotopic Separation - General
PI 24.11-2	Isotopic Separation - Deuterium & Hydrogen
PI 24.11-3	Fractional Distillation
PI 24.12-0	Heavy Water Production - Enriching
PI 24.13-0	Heavy Water Production - Finishing Process
PI 24.21-1	Secondary Heat Transport System - Impurities
PI 24.21-2	Chemical Additives and Blowdown
PI 24.21-3	Make-Up Water Treatment Plant
PI 24.21-4	Secondary System - Materials
PI 24.22-1	Moderator, Cover Gas - System Materials
PI 24.22-2	Moderator Water Chemistry
PI 24.22-3	Moderator Water - Purification
PI 24.22-4	Cover Gas Purity
PI 24.23-1	Primary Heat Transport System - Materials
PI 24.23-2	Commissioning (Chemical Conditioning) of the Primary Heat Transport System

PI 24.23-3	Primary Heat Transport System Chemical and Impurity Control
PI 24.23-4	Transport of Radioactivity in Nuclear Reactors
PI 24.30-1	Radioactive Materials/Management
PI 24.41-1	Heavy Water Leakage - Detection
PI 24.42-1	Heavy Water Leakage - Recovery by Molecular Sieves
PI 24.51-1	Environmental Monitoring - Radiological Emissions
PI 24.51-2	Environmental Monitoring - Radiological Emission Measurement
PI 24.52-1	Environmental Monitoring and Control - BHWP
PI 24.52-2	Environmental Monitoring and Control - General
PI 24.60-1	Chemical Cleaning of Fouled Equipment
PI 24.61-1	Chemical Cleaning - NGD Experience
PI 24.70-0	Chemical Analysis - General

Chemistry - PI 24

INTRODUCTION

---

(a) Check-Out

Always first on everyone's mind is the check-out requirements. There will be a written check-out for this course. Be prepared to be tested on any or all of the stated objectives at the start of each lesson.

Hint: If you do all of the practice exercises you won't see anything new on the check-out.

(b) Course Format

You are advised to follow the course map which follows this introduction; you may start at any one of the modules across the bottom and then move up the lines. You are advised to do all the lessons below the dashed line before moving across it. Each lesson is presented in the general form: (1) Objectives (2) Material (3) Practice. Just start right in and move at your own speed.

(c) Reference Material

The Course Manager will supply these on request. Please don't steal the articles for reference as the next class would like to use them.

(d) Group Discussions

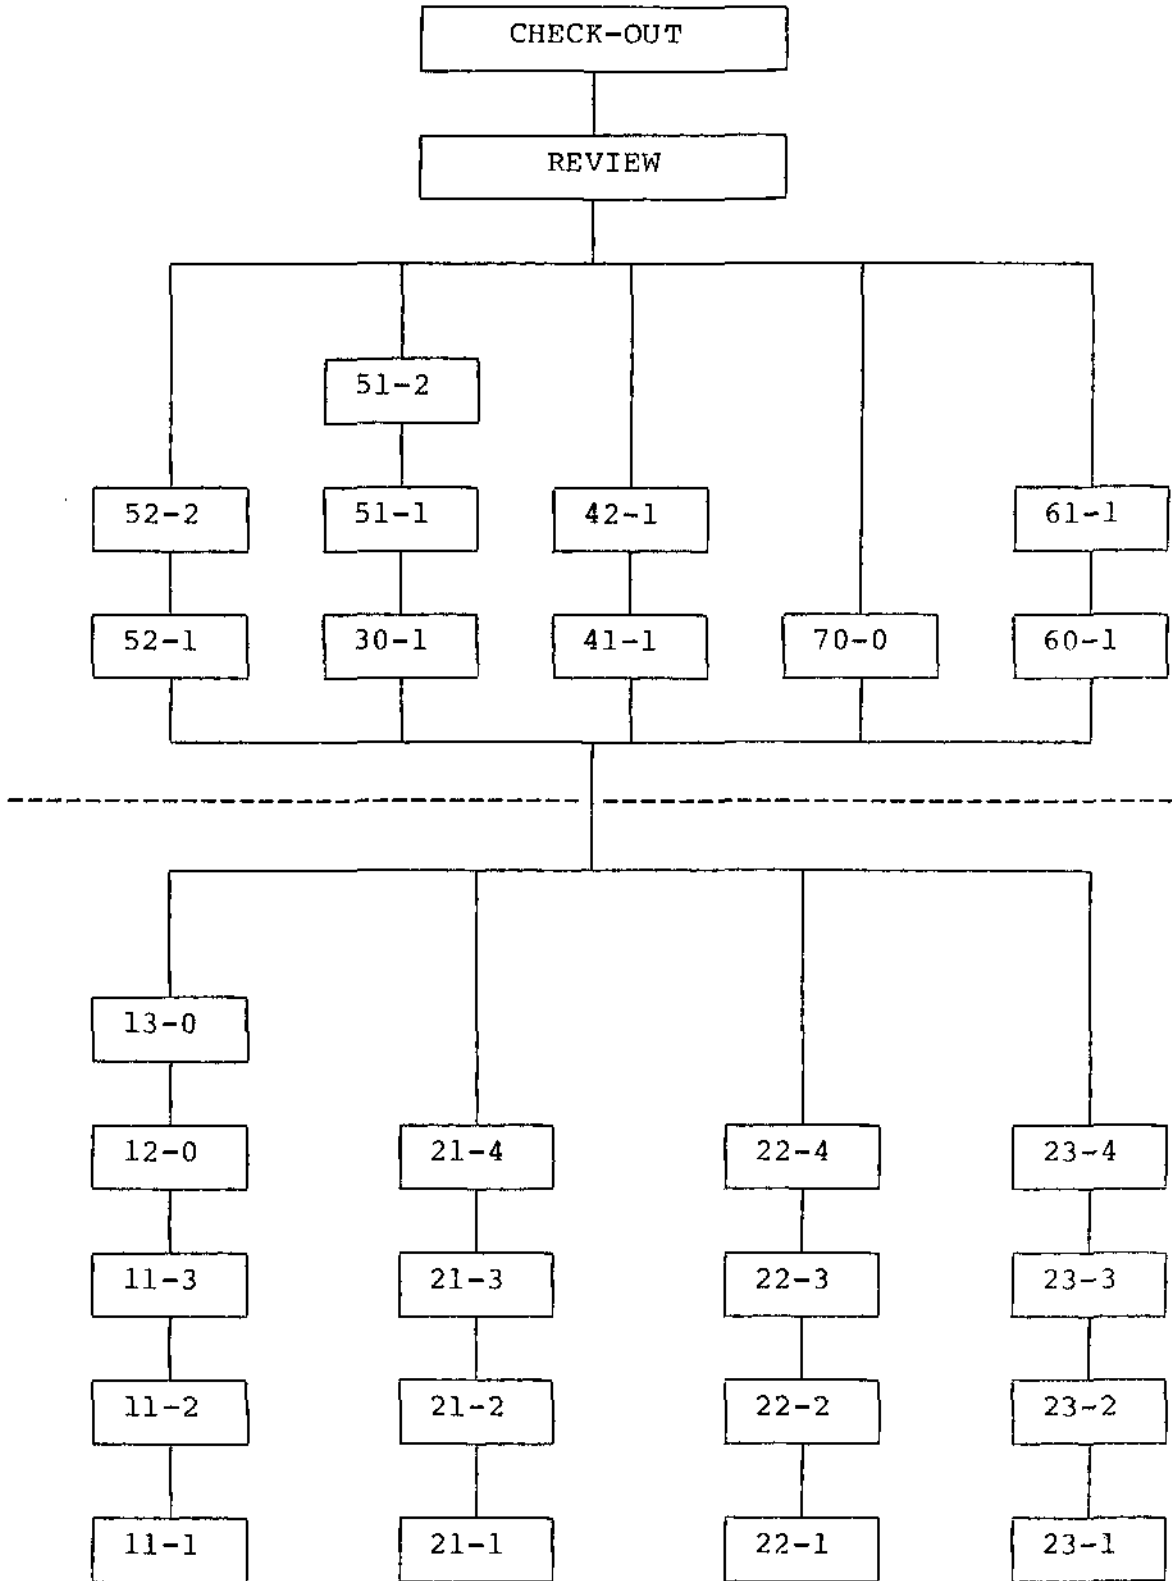

Some modules ask you to have a group session, it is to your benefit to vary the members of your group for each of these.

(e) Module Check-Off

Some modules ask you to check your work with a colleague or Course Manager before proceeding. This is a highly recommended practice as proceeding with misconceptions is hazardous to your learnings.

(f) Formal Presentations/Lectures (Absence of)

The Course Manager will review any of the topics with a group or individual on request.

P.D. Dodgson
